29 July 1983

MEMORANDUM FOR THE RECORD

SUBJECT: New Building Appropriation Language

STAT On 28 July 1983, the undersigned contacted Chief, Building Planning Staff, Office of Logistics, to determine if fiscal year 1984 appropriation language regarding the new Headquarters building clearly identifies the fact that the legal control, operation, and maintenance of the building rests with the Central Intelligence Agency rather than with General Services Administration. He indicated that he was not quite sure how the language was finalized but did not believe that the issue was specifically addressed. I indicated that I hoped that some support for the Agency's position was included in the language and that if not, we should make sure we get our act together for the remaining construction funds to be appropriated in the fiscal year 1985 budget. I have asked Helena to secure copies of our submission to Congress so that we can review them in greater detail.
